Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

1. The indicated allowability of claims is withdrawn in view of the newly discovered reference(s) to Payton [Pat. No. 4,323,719]. Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
3. Claims 8-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
4. Claims 8 and 20 recite "the feeding direction being generally perpendicular to and rotated about 90° from the axis" of the drum. It is not clear what direction this would constitute since any direction which is "perpendicular" to the axis would also be "rotated about 90° from the axis".
5. Claim 19 recites "its". It is not clear what "it" is.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 1761

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1-5 and 8-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Payton [Pat. No. 4,232,719].

Payton teaches a method of shredding blocks of material, such as tree stumps, by rotating a drum with blades (Figure 1, #31), feeding the block of material toward the drum on a plane that is substantially perpendicular to the drum axis (Figure 3, #47), shredding the block of material (column 3, lines 15-25), rollers (Figure 1, #13B-C), a bottom belt (Figure 1, #13), the bottom belt having mechanical arms protruding upward (Figure 1, #20), and the a hydraulic motor powering the belt, rollers, and arms (column 4, line 58).

Allowable Subject Matter

8. Claims 16-20 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

9. Claims 6-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

10. Claims 14-15 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

11. The following is a statement of reasons for the indication of allowable subject matter: the method of shredding a block of material of dependent claims 6 and 14, as

Art Unit: 1761

well as independent claim 16, define over the prior art since the prior art does not teach, suggest, nor render obvious shredding a block of cheese.
